

WHY ARE PATIENTS ACROSS EUROPE NOT RECEIVING OPTIMAL HEALTHCARE?

Because real world data is locked in systems with different structures and terminologies in many languages, systems and structures. EHDEN was established to bridge this gap and maximise the transformational potential of data, at scale, to generate real world evidence that ultimately improves patient treatments and outcomes.

Our mission

Provide a new paradigm for the discovery and analysis of health data in Europe, by building a large-scale, federated network of data sources standardised to a common data model.

Our vision

Aspire to be the trusted observational research ecosystem to enable better health decisions, outcomes and care.

EHDEN is now in its fourth year and has met or eclipsed all of its initial targets.

Some of our **achievements**, to date:

Our evidence generation in e.g., COVID-19, inflammatory diseases, oncology is already being demonstrated in **~50 publications**

140 Data Partners in **26** countries

47 certified SMEs in **19** countries

More than **500 million** anonymous health records are being harmonised to the OMOP Common Data Model

15 courses are available on EHDEN Academy

Voice of EHDEN podcast series is now in its second season

**SHARED, STANDARDISED REAL WORLD DATA IS SAVING LIVES
- BE PART OF THE OPEN SCIENCE DIALOGUE! -**
